Complainant:	Mark Thorne, PharmD (Lead QA Pharmacist)	Contact Email:	m.thorne@stjude-health.org
Direct Phone:	(555) 443-9000 ext. 4102	Address:	100 Hospital Plaza, Suite 3B, Chicago, IL

PRODUCT & LOT DETAILS

Product Trade Name:	PulmoVent 100mcg Inhalation Aerosol (Albuterol Sulfate)
Lot / Batch Number:	LOT-99321-X
Manufacture Date:	01/2025
Expiration Date:	01/2027
Package Format:	200-Actuation Canister in Foil Pouch Blister Carton

DEFECT DESCRIPTION & FINDINGS

During routine cleanroom intake inspection of Shipment #PO-883910, hospital pharmacy technicians identified a critical packaging defect affecting 4 out of 25 shipping cartons (total of 48 individual units affected).

Observed Defect: The protective outer foil barrier pouches for the PulmoVent inhalers exhibit incomplete heat sealing along the longitudinal bottom margin. The heat-seal seam displays unbonded channel voids ranging from 3mm to 12mm in length, allowing ambient air and moisture exposure to the primary actuator and valve assembly.

Risk Impact: PulmoVent canisters require moisture barrier protection to prevent hygroscopic clumping of the micronized albuterol powder. Unsealed foil pouches compromise dose uniformity and valve delivery characteristics. All 48 compromised units have been quarantined in our pharmacy hold room.

Corrective Action Requested: Issue Return Material Authorization (RMA) for replacement of Lot LOT-99321-X and initiate packaging line seal integrity audit.
